

## Personal Monitoring System

## V2Mix<sup>®</sup> Pro Demo Mode Setup Guide

## Using V2Mix<sup>®</sup> Pro in Demo Mode

It is possible to try the Pivitec V2Mix<sup>®</sup> Pro mixing system on your iPad<sup>®</sup> without having a system on hand by utilizing demo mode resident on the app itself, with 8 tracks of pre-recorded audio. The sound quality will not be representative of the Pivitec e32 Mixer with its powerful headphone amp, but is adequate to show the workings of the V2Mix<sup>®</sup> Pro mixer app. Access the demo mode as follows:

1. Download the V2Mix<sup>®</sup> Pro app from the Apple App Store.

2. Open the "Settings" screen.

3. Scroll down to the V2Mix® Pro button, and select.

4. The "Demo" option will appear on the upper right part of the Settings Screen.

	1:33 PM		€ 100% ■
		v2Mix Pro	
Demo			

5. Touch the Button to enable Demo Mode.

	1:33 PM		€ 100% ■
		v2Mix Pro	
Demo			

6. Return to the main screen, open the app, and enjoy mixing with V2Mix® Pro!

7. When you have finished in Demo Mode, disable by simply reversing the above steps.
