

e16i/o - MY 16-Channel Interface Card

The Pivitec e16i/o-MY 16 is a Mini-YGDAI 16-channel bidirectional network interface card for Yamaha digital consoles. Use the Pivitec e16i/o-MY for a direct digital connection between compatible Yamaha consoles and other Pivitec network audio devices such as the e32 Personal Mixer. Depending on the expansion capabilities of the console, multiple e16i/o-MY Cards can be combined together or used with other Pivitec Modules to build larger audio networks.

Features:

- Standard Mini-YGDAI MY16 Card
- Supports 48kHz, 24-bit audio
- Use multiple cards to expand network audio channels
- Connects with other Pivitec Network Audio devices
- Made in USA

Specifications:
